

Canterbury SCHOOL

The Canterbury School Super Curriculum

At Canterbury School, learning doesn't start and stop at the classroom door. Our Super Curriculum is designed to inspire curiosity, creativity, and a genuine love of learning by encouraging students to explore their subjects beyond the timetable.

Each department has created a set of exciting, enriching activities – nine in total – that extend and deepen what you study in lessons. These might include reading an extra book by an author you've enjoyed in English, listening to a podcast about a scientific discovery, visiting a local museum, or even trying out a creative project inspired by your learning.

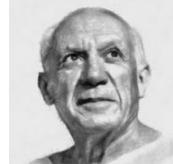

The aim is simple: to give you the chance to take your knowledge further, make connections between subjects, and discover new interests along the way. Whether you choose to complete one activity or explore them all, the Super Curriculum is your opportunity to take ownership of your learning and see where your curiosity leads you.

We believe that great learning happens when you're inspired to go further. The Super Curriculum is your invitation to do just that – to take risks, follow your interests, and celebrate the joy of discovery. We encourage every student to get involved and make the most of the opportunities waiting beyond the classroom.

Also, don't forget to show your subject teacher what you have completed, as each activity earns a Merit Point. ☺

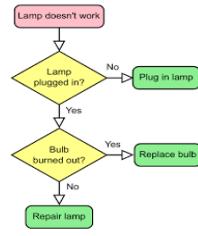

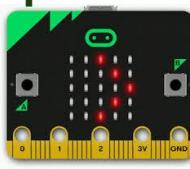

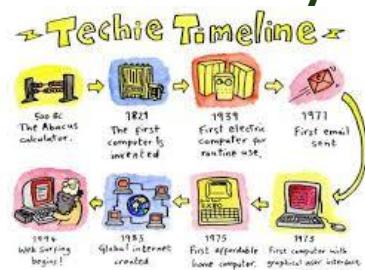

Super Curriculum Art/Photography Year 7

| | | |
|---|--|--|
| <p>Learn to sketch a subject you find interesting from memory.</p>  | <p>Create a piece inspired by a place you have visited on holiday</p>  | <p>Invent a fun activity for National Art Week.</p>  |
